

NATURSORB WELL SERIES

Natursorb well series is the greenest possible option when it comes to dealing with your well problems.

PROBLEMS:

- Iron (Red Staining) 7ppm
- Hydrogen sulfide (rotten egg smell) 8ppm
- Manganese
- PH (deals with low PH values)

The NS-7000 deals with most of the problems that your water can have and does so in the GREENEST way possible. **NO CHEMICALS**, no chlorine, no potassium, nothing to hurt children, pets, plants or the environment. We can not call this system green but, it's as close as it gets when dealing with well water.

Makes your well water taste as good as any bottled water with none of the problems associated with bottled water.

**LONGEST WARRANTY
IN THE INDUSTRY**

ABOUT NATURSORB WATER

WHAT WE DO

Our goal is to provide the best possible water at the least expense to our customers. Whether it is removing chlorine from city water or IRON from well water, we want to perform all services in the very best, and in the most professional way. We strive to provide good water to you and your family and we want to do this in the GREENEST possible manner.

ENVIRONMENTALLY FRIENDLY

We will not sell an ion exchange softener (salt softener) since we do not believe that salt is good for you nor for the water drainage system. We will not install a Reverse Osmosis (RO) system because it takes 4 gallons of water to make one gallon of drinking water. Our goal is always to only provide systems that operate in the least harmful manner. This does not mean we are willing to skimp on the quality of water we provide. We test your water for many things but the best test is with your unit in place and then you can take a big drink and smile because you know it is good water.

At Natursorb we have a saying that goes:

**YOU SHOULD NOT
HAVE TO THINK
ABOUT YOUR WATER**
